UNPARALLELED INDUSTRY EXPERTISE

Our renowned experts have extensive and accomplished experience demonstrated globally over 25 years in a broad range of business sectors particularly, in education and vocational skills, process, manufacturing and construction supply chain industries.

We use this game-changing brilliance to bring about systemic change in technical and vocational education and training (TVET), apprenticeships and workplace competence assessment.

A SYSTEMIC APPROACH

MAXIMISING PARTNERSHIP

At the heart of our focus is collaboration and partnership. Our philosophy drives us to support the development and delivery of skills by drawing on world-class expertise and best practice, whilst creating a sustainable skills system that is self-owned and shared through a collaborative and dynamic approach.

We support Governments, Non-Government Organisations (NGO), donors and employers in policy development and implementation, impact assessment and effective skills investment.

We enable individuals, employers, colleges, universities, training providers and Governments in any country, to develop employability, entrepreneurial, technical skills and work competence via all vocational routes, including apprenticeships.

We operate in the UK & across the globe in Europe and wider Europe, Middle East and North Africa, South America, and Asia.

EFFECTIVE DELIVERY, SIMPLE DESIGN

Our **Diagnose > Design > Deliver** approach helps employers, Governments and their agencies develop the right series of skills policies and then supports the policy implementation, testing and rollout through further education colleges and independent private training providers and employers.

Whether working at the employer level, college/ university or national or regional level, our team can help create and drive a skills agenda that achieves great success, where others have failed.

WE ENABLE INDUSTRY TO DEVELOP THE SKILLS EMPLOYERS NEED

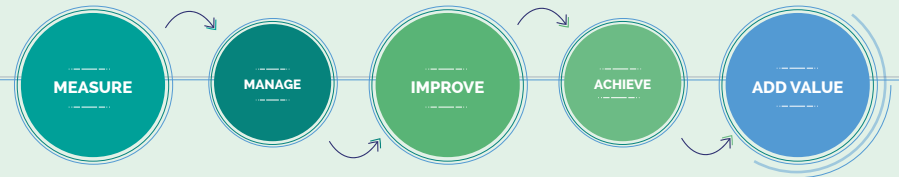

CREATING IMPACT

We create positive impact by enabling systemic and lasting change in skills policy and its implementation. Our attitude and actions are demonstrated in the way in which we treat individuals with dignity and respect, that is developed through dialogue, one which is inclusive in diversity and enables mobility.

As we strive to create positive impact for society, businesses and individuals, the resulting success is promoted and shared both in-country and across the globe. We believe that the sharing of best practice success stimulates further innovation and encourages talent development in all.

MEASURE & CELEBRATE BUSINESS IMPACT

AWARD- WINNING

Having successfully led a team to become the twice co-winner of the **British Council's prestigious International Skills Partnership of the Year award in 2014 & 2015** ...

... you can be confident that the robust methodology that we employ in developing skills policy and in its implementation, is our way of ensuring that the right impact is achieved for individuals, for the businesses they work for and for society at large.
